

10 Reasons

Why you should buy a Beam Vacuum System!

BEAM 0800 10 25 26

1. Central Systems, the most powerful of all Vacuum Cleaners.

An Airwatt is a measurement unit of the effectiveness of Vacuum Cleaners. This refers to airflow and suction power. Cleaners rated with similar airwatts, will have similar suction power.

The Power Unit of the Central Vacuum Cleaning System is a fixed appliance, usually installed in the garage.

By this design, the motor and fan (the power source of cleaners) are considerably larger than portable cleaners, weight is not an issue. Consequently a System, will have greater Airwatts and thus more Vacuum Suction power, than any other type of cleaner available.

Stick Vacuum Cleaners, small, portable, rechargeable battery limits duration of use, revolving heads reduce cleaning time. Good for quick clean-up, smaller spaces, mats and hard floors. Must be light weight as carried in one hand. Empty after each use, Exhausts into the room being cleaned. Small motor and fan. (see photo) **Airwatts 120-185**

Portable pull-around Vacuum Cleaners, traditional cleaners, range of quality and prices available, plug in cord. Good for people who don't own their own homes. Exhausts into the room being cleaned. Can be quite heavy, about 7-10kgs. Difficult to use on stairs. Often lose suction as the bag fills, on-going cost of replacement bags (if required). **Airwatts 100-280**

Beam Central Vacuum Cleaning Systems, Home owners. Can be 'built-in' to new or existing homes. The ducting is installed at framing stage when building. Higher initial cost but, is a permanent chattel, for the life of the home. Adds to appeal, saleability and to the value of the home.

Large, heavy duty motor and fan, in Power Unit installed in garage. (see photo)

Good for homes with larger living areas. Vacuum clean with a 10 metre light-weight hose, weighs about 3kgs. The hose plugs into a number of wall inlets, positioned around the house.

Tangible health benefits as the exhaust of the cleaner, normally expelled in the room, is removed from the area being cleaned. Can be vented directly outside. . Good for dusting and upholstery. Systems transport the dust and dirt away. Good for asthmatics. The extra power 'Deep Cleans' the carpets, giving longer life. **Airwatts 600-700**

2. Ease of cleaning.

You vacuum with only a light weight hose which follows behind you.

- stores easily in three loops on hose hanger
- no pulling around a heavy cleaner or marking the corners and walls of your new home.
- hose covers can be purchased for extra protection.

Plug in your hose, most homes only need 2-4 hose inlet points. Clean your car from Inlet on Power Unit in garage.

3. Large capacity dirt collection, no bags.

Empty Power Unit only 3 times a year. Suction is not lost as the bucket fills. Inverting Gore-Tex filter. Efficiency 98% at 0.3 microns

On-Guard Bucket

The On-Guard™ dirt receptacle is infused with the anti-microbial agent AlphaSan® preventing bacteria growth on the bucket.

BEAM Alliance Systems, have a 10 year warranty

4. You are conscious about living in a healthy environment.

Breathe Clean, Healthy Air, Healthy Home

Recent trends see New Zealand homes being built to achieve air tightness. While this does improve the energy-efficiency of homes, it also means less air circulation and a decline in air quality. The quality of the air inside the home can be worse than people think.

Make sure you open a window before you start cleaning!

The heavy-duty motors and fans in our Cleaning Systems shift a lot of air.

- the complete removal of the air and dirt being vacuumed from the room, encourages fresh air to be drawn into and re-circulated in the room.
- this is a design feature which is unique to central cleaning systems.

The Beam Alliance series was evaluated by the NZ Asthma Foundation over a six month period and is now the only Central Vacuum System recommended to help asthma, hay-fever and allergy sufferers.

5. Safer and easier to clean stairs.

Safer and easier when cleaning stairs with long hose

The hose trails up behind you when you are cleaning the stairs.

- no carrying a cleaner and vacuuming the stairs with the other hand.
- this eliminates the risk of over-balancing, much safer and easier.
- you can concentrate on giving the stairs a good clean.

6. Vacpan in the Kitchen.

Your Beam vacuum system can be directly connected to a Vacpan in the kitchen.

- this is a wonderful accessory, no more down on your knees with a brush and shovel.
- grab your broom, sweep the crumbs to the Vacpan, turn it on with your toe and like magic the dirt disappears in an instant.

7. Very little noise when you clean, on/off and speed control on handle of hose.

If the phone rings you can turn the System off, with your thumb.

- you won't disturb people who are sleeping.
- you can also control the amount of suction that you require.

8. Easy storage of Hose and Attachments.

The hoses are easy to use. They store on a hanger, when you need them, you lift in a loop. Photo shows a cupboard in the laundry.

- dusting is done with a multi-purpose 3 way brush
- furniture should be vacuumed on a regular basis with the upholstery brush
- you'll be amazed at the amount of dirt that the extra power of your systems will remove from your furniture.

- you'll lengthen the life of your upholstery.
- allergy sufferers should regularly vacuum their mattress's.
- special brush available for your cat or dog.

9. When you are building your new home, 'plan for the future'

If you can't afford a full system initially, 'plan for the future' by installing the ducting only, at the framing stage of construction.

- *'don't miss this important opportunity'*
- this leaves you the option of commissioning the system when the priority is right or when the new carpet goes down.

Getting the ducting installed is normally about 1/3 of the total price of a full system.

- pre-pay that part of your system.

Cleaning your home is a regular task and is so important for you and the health of your family.

Build in a Beam System which will last for 'the life time' of your home. Your family deserve the best. Give your new home this wonderful feature. Ask your builder! Installation is simple!

10. Have Confidence when buying from Beam New Zealand Ltd

We have a network of agents throughout New Zealand. Our installers are some of the most experienced in the industry. We have been in business for 30years.
